PROFILE

I have five years of computer academic education. And want to become successful web developer because coding is my hobby. I am learner and want to learn in my whole life. Please sir/madam kindly give me a chance to become a developer so that i can prove myself . Coder with excellent typing skills.

WORK EXPERIENCE

IT Trainer

Pragati Industrial Training institute

- Tought basic computer there.

Projects

1. NewsApi- In this project i learn class based and function based component, React Life Cycle, Hooks , Routing, how to fetch api data into react single page application. Add various functionality to social media share. add timer and calender, hover animations etc.
2. TextUtils- In this project i learn function based component, using react hooks, changing theme, Alerts, adding custom pallete and various logics that are helpful in my upcoming projects.
3. Netflix Clone- With the help of tailwind css i used css in this project slider included, various like buttons, fetching api and also learned back end firebase used for back end here. I also used mongodb database and node and express and i learned hashing password salt method. But i want to become expert in Frontend first that's why i am applying for frontend dev jobs.
